## COMMISSIONING & STARTUP

Every Project Manager knows project milestone dates must be met. On-time is the goal from the moment the project begins. The consequences of not maintaining schedule usually results in project cost overruns, lost revenues, and liquidated damages.

PIC Project Support Services can help you in a variety of ways throughout various stages of your power plant project. Whether you require support for planning and scheduling, documentation, QA/QC, or EHS — or maybe you're ready to start a walkdown and complete the commissioning and startup process — PIC can provide the level of support you need.

# TWO OPTIONS FOR SCALED SUPPORT

PIC can supply all necessary tools, equipment, and personnel for your project and we offer two options to deliver the just right level of support. When you'll handle some of the work yourself, we offer **Project Support Services** on a Time & Material basis. If you want PIC to handle the project (scaled to your needs), we also offer **Managed Support Services** for a Fixed Price.

## Managed Support Services

PIC's Managed Support Services provide smooth transitions from construction to operation—quickly and efficiently. We work under a managed program to ensure a safely commissioned and tested plant that meets all expectations for performance, reliability and maintainability.

Applying lessons learned through our experience in the Construction, Commissioning, and Operation & Maintenance of over 5,000 power projects, PIC offers a fully customizable range of services to meet your needs.

Key program deliverables can include:

- Project Technical Library
- Startup & Commissioning / Quality Program
- Project Technical Library
- Scoped Drawings
- Turnover Packages
- Commissioning Procedure
- Component Test Standards
- Integrated System Test Standards
- OEM Manual
- Integrated Operations Manual (Ops Manual)
- O&M Manual
- Training of Personnel
- Computerized Maintenance Management System (CMMS) Implementation

## Project Support Services

As you look to achieve or maintain operational readiness, you can rely on PIC to provide you with the individuals that have the technical experience to ensure your success. Our expertise includes but is not limited to supplying the following personnel:

- Construction Manager, Craft Labor, Techs
- Startup Manager, all required Leads, DCS
- TAs for specific OEM equipment
- Control Room and Auxiliary Operators
- Strike Contingency Support Teams
- QA/QC Manager
- Turnover Coordinators
- EH&S Manager

PIC's Employee Care Department manages the process of our employees arriving to your site, helping any screening or training requirements, help in finding housing, or other needs to ensure their productivity from outset. They maintain this level of care throughout the employees' time on site.
